

# AI, What Have You Done For Me Today?

## Finance: Fraud Detection

While many are familiar with Artificial Intelligence (AI) through chatbots and virtual assistants, the impact of AI extends far beyond these familiar applications. In fact, AI has become an intrinsic part of our daily lives, often in ways not immediately visible to the public. Today, in industries as diverse as agriculture, transportation, energy, and healthcare, AI is often behind the scenes, quietly revolutionizing business processes, and enhancing efficiencies and accuracy.

### AI & Fraud Detection

In today's digital age, financial fraud has become a multibillion-dollar enterprise. Instead of old-fashioned bank robberies and pickpocketing, we now encounter identity theft, credit card fraud, and phishing scams. However, the rise of artificial intelligence tools and software is dramatically changing the ways in which institutions can defend against such financial deceptions.

Imagine, for instance, you're in a charming Parisian street market, admiring exquisite Dior earrings at a jewelry stall and picking out a bouquet of vibrant peonies to brighten up your hotel room. But when you reach for your wallet to pay, you realize it's gone – stolen amidst the bustling crowd. Panic sets in as you consider all the unauthorized transactions that might suddenly be accumulating in your account.

Fortunately, your financial institution now has an advanced AI fraud detection system in place to shield you from such situations. This AI system works like an ultra-sharp-minded security guard, constantly monitoring transactions to detect unusual activity. For example, if your credit card is used in another country or for high-value purchases that deviate from your typical spending habits, the AI system immediately notices and recognizes that something is amiss.

Here's how these AI systems help:

- **Pattern Recognition:** AI programs can examine millions of transactions a second, identifying patterns and anomalies that traditional methods might miss.
- **Real-Time Alerts:** As soon as the AI program detects suspicious activity, it sends alerts to both you and your financial institution, creating an opportunity to immediately freeze your card and prevent further unauthorized transactions.
- **Proactive Protection:** AI enhances identity verification for know-your-customer (KYC) and anti-money laundering (AML) processes. Using deep learning, graph neural networks (GNNs), and natural language processing (NLP), AI programs analyze photo IDs and verify their authenticity, reducing the risk of fraudulent records.

## Sample Holding

JPMorgan Chase's (JPM) OmniAI system is a comprehensive AI platform designed to enhance various aspects of their financial operations such as customer service automation, risk management and private banking. OmniAI's powerful fraud detection program continuously monitors customer transactions in real-time to identify and prevent fraudulent activities

Today, the enhancements being implemented at many institutions can ensure that even in stressful situations like having your wallet stolen, advanced AI systems are diligently working to protect your financial well-being while reducing undue anxiety.

The views expressed are the views of Fred Alger Management, LLC (FAM) and its affiliates as of August 2024. These views are subject to change at any time and may not represent the views of all portfolio management teams. These views should not be interpreted as a guarantee of the future performance of the markets, any security or any funds managed by FAM. These views are not meant to provide investment advice and should not be considered a recommendation to purchase or sell securities.

**Risk Disclosures:** Investing in the stock market involves risks, including the potential loss of principal. Growth stocks may be more volatile than other stocks as their prices tend to be higher in relation to their companies' earnings and may be more sensitive to market, political, and economic developments. Local, regional or global events such as environmental or natural disasters, war, terrorism, pandemics, outbreaks of infectious diseases and similar public health threats, recessions, or other events could have a significant impact on investments.

**Investing in innovation is not without risk and there is no guarantee that investments in research and development will result in a company gaining market share or achieving enhanced revenue.** Also, developing technologies to displace older technologies or create new markets may not in fact do so, and there may be sector specific risks as well. As is the case with any industry, there will be winners and losers that emerge, and investors therefore need to conduct a significant amount of due diligence on individual companies to assess these risks and opportunities. **Companies involved in, or exposed to, AI-related businesses may have limited product lines, markets, financial resources, or personnel as they face intense competition and potentially rapid product obsolescence.** These companies may be substantially exposed to the market and business risks of other industries or sectors and may be adversely affected by negative developments impacting those companies, industries, or sectors, as well as by loss or impairment of intellectual property rights or misappropriation of their technology. Companies that utilize AI could face reputational harm, competitive harm, and legal liability, and/or an adverse effect on business operations as content, analyses, or recommendations that AI applications produce may be deficient, inaccurate, biased, misleading or incomplete, may lead to errors, and may be used in negligent or criminal ways. Companies exploring new technologies may face regulatory, political or legal challenges that may adversely impact their competitive positioning and financial prospects.

**Important Information for US Investors:** This material must be accompanied by the most recent fund fact sheet(s) if used in connection with the sale of mutual fund and ETF shares. Fred Alger & Company, LLC serves as distributor of the Alger mutual funds.
